

# Primary Programs

# 2022 Programming

## Science Fairs

**Timing: Spring 2022**

13 regional science fairs are available across BC and the Yukon, giving you the opportunity to explore your curiosity and creativity in science and win cash prizes and scholarships. Projects can cover a variety of scientific disciplines and are judged based on your scientific logic and reasoning, adherence to the scientific method, and communication.

## Youth Innovation Showcase

**Timing: Fall 2022**

This is an innovation competition for you to present your cutting edge ideas and inventions to industry experts for a chance to win \$5,000. You must live in BC or the Yukon and be between 12 and 19 years old to participate. Judges evaluate innovations based on creativity, project difficulty, and your presentation.

# Support Programs

## Workshops

**Timing: Monthly from October, 2021 - March, 2022**

A series of STEM-based workshops designed to help you understand the foundations of a great STEM project. These free virtual workshops will discuss topics like the scientific method, ethics and safety, analyzing and understanding your results, and science communication.

## Financial Aid

**Timing: Fall 2021**

Created to provide financial support in your pursuit of STEM inquiry, the Discovery Foundation STEM Project Grant is inviting you to apply for funding between \$50 and \$200 that will help you build your STEM project, or compete in a Science Fair Foundation BC event. You must live in BC or the Yukon and be between the ages of 9 and 18 to apply.

## Mentorship

**Timing: December 1, 2021 - Mid-April, 2022**

The Mentorship Program connects you to science fair experts and professionals in the scientific community who can provide knowledge, experience and feedback during the development of your STEM project. At any stage in your project, you can submit a question through our webform and receive an answer by email.
