

YOUTH INNOVATION SHOWCASE

VOLUNTEER AS A JUDGE

INSPIRE AND ENCOURAGE THE NEXT GENERATION OF STEM LEADERS!

YOUR ROLE

Youth from all across BC and the Yukon are creating their STEM innovations in preparation for the 2022 Youth Innovation Showcase, a competition that showcases the brilliant ideas and inventions from future scientists in our province and territory. As a STEM enthusiast and volunteer judge, you'll meet with these youth in a virtual interview, hear about their projects and motivation, and provide feedback to inspire their curiosity and love of science.

YOUR AUDIENCE

You will be speaking to youth in BC and the Yukon between 12 and 19 years of age. These are young STEM enthusiasts who have discovered (or are just beginning to explore) their passion for science and technology. Your primary goal as a Youth Innovation Showcase judge is to inspire and support these youth by sharing your own knowledge, experience and passion for science, and providing feedback that they can use to further their understanding in STEM.

REQUIREMENTS

A background in science is recommended, but not necessary. With an emphasis on science and communication, the Youth Innovation Showcase pushes youth to develop the ability to explain their complex scientific theories and ideas to investors in any industry.

The Youth Innovation Showcase is an entirely virtual event. Two judging rounds will take place virtually with judge scores and feedback submitted via an online form. Sign up for one round or both. Judge training is provided.

JUDGING ROUNDS

	Judging Dates	Online Student Interview	Review Projects Online	Submit Feedback Online
Semi-Finals	Oct. 25, 2022	Yes	Yes	Before Oct. 28, 2022
